

Peragreen® 5.6%

Sustainable Disease Control and Water Treatment

Peragreen 5.6% is a peroxyacetic acid-based microbicide that can be used in agricultural or horticultural applications. It can be used in soil or foliar applications to control bacterial and fungicide diseases present in soil or on growing agricultural crops. This product can also disinfect and sanitize your water used for irrigation or drip water systems and greenhouses to control bacteria, slime, odor and algae.

PERAGREEN Key Advantages

- Used in soil or foliar application as a fungicide for various crops to control diseases such as, powdery mildew, downey mildew, and blight
- Developed to eliminate bacteria, slime, odor and algae
- Used to disinfect your water used for irrigation and drip water systems
- OMRI Listed
