

BRANDT® Manni-Plex® Zn

Foliar Zinc Solution

3-0-0

Guaranteed Analysis

Total Nitrogen (N).....	3.0%
2.8% Nitrate nitrogen	
0.2% Urea nitrogen	
Zinc (Zn).....	7.0%
7.0% Water soluble zinc	

Derived from zinc nitrate and urea.

F76

General Information

BRANDT MANNI-PLEX Zn is designed for application to all field, row, vegetable, fruit, tree and vine crops, and ornamentals for the prevention and correction of zinc deficiency when used as part of a balanced fertility program.

Rate Recommendations

Field, Row, Vegetable, Fruit, Tree and Vine Crops: Apply 1-2 quarts per acre per application throughout the growing season. At least 3 applications are recommended. More frequent applications at 1.5 quarts per acre may be needed to correct deficiencies once they occur. For pre-plant or sidedress applications, use 1-2 gallons per acre.

Ornamental Crops: Apply 1-2 quarts per 100 gallons water. Cover foliage thoroughly to point of runoff.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Net Contents: 2.5 gallons (9.46 liters)

Density: 10.2 lb/gal @ 58°F

Net Weight: 25.2 lb (11.4 kg)

Packaged: 2 x 2.5 gallons (2 X 9.46 liters)
